### WEEK #24

#### Should I upgrade to Windows 7?

##### Answer:

Windows 7 is a fantastic Operating System. It won't have a lot of the issues that Vista did when it first came out because it uses the same drivers for printers, video cards, etc. as Vista. There will be some kinks in the beginning, but Microsoft will resolve those quickly and most users will never even know they existed.

Want to know more about what Windows 7 can do and whether it is right for you? Attend my FREE Windows 7 Seminar (Only room for 50 People. [MUST RSVP HERE.](#))
